ATF facilities
Technical office:
The ATF technical office is the heart of the company and employs 11 people divided into 4 sections:

- Mechanical engineering (3D - Autodesk INVENTOR 2016)
- Electric engineering (SPAC 2015 software)
- Software engineering (TIA Portal SIEMENS) (CX One OMRON)
- Technical manuals (Microsoft Publisher)

Main stages of the production process:

**BARCODE tracking**

- Every stage of the production process, from design to assembly, is monitored by a computer system
- Human resources participate in the process of production

Please find below an example of recording process of a mechanical part

Customized lines
Over 90% of the ATF production is built to measure, and suitable to the specific requirements of the customers, who increasingly demand tailor-made installations

Market
ATF exports 95% of his production worldwide.
Main markets:
- Europe
- Russia
- USA

FAT (Factory Acceptance Test)
All the lines are completely erected in Italy and tested before shipment.
